

Cherry River - COO Weekly Ops Pack

Progress Report & Next Steps

Prepared for: Francis **Date:** January 2026 **Project:** Automated Inventory Intelligence & Decision Support System

Executive Summary

We have successfully built the foundation of Alyssa's COO Weekly Ops Pack - an automated system that monitors SAQ store inventory, identifies critical stockouts, and provides actionable intelligence every Monday morning.

Current Status: Phase 1 Complete (SAQ Intelligence) - Ready for Demo **Next Milestone:** SAQ-Odoo Integration (Requires product mapping)

What We've Built So Far

1. SAQ Data Pipeline (100% Complete)

What it does:

- Automatically downloads weekly sales and inventory data from SAQ
- Processes data for all 24 Cherry River products across 390+ SAQ stores
- Calculates sales velocity, days of inventory, and stockout risk
- Updates database every week (can be automated for Monday 6 AM)

Business Value:

- No more manual data downloads from SAQ portal
 - Real-time visibility into store-level performance
 - Historical tracking of sales trends
-

2. Automated Email Alerts (100% Complete)

What it does:

- Sends daily email alerts to sales reps when their stores have critical inventory issues
- Groups alerts by territory (Sophie → Montreal, Junior → North Shore, etc.)
- Highlights urgent ruptures vs. routine restocking needs

Business Value:

- Sales reps know exactly which stores need attention
 - No more checking spreadsheets manually
 - Faster response to stockouts = fewer lost sales
-

3. COO Dashboard - SAQ Intelligence (65% Complete)

What it does:

- Single-page view of entire SAQ network health
- Color-coded sections showing urgency levels
- Drill-down tables for detailed investigation
- One-click export to CSV for reporting

Dashboard Sections:

Executive Summary (Green)

Metric	Current Value	Status
Overall Rupture Rate	3.1%	✔ Below 5% target
Inventory Turnover	19.9x/year	✔ Excellent (industry: 20-30x)
Weekly Sales	\$820,391	✔ Strong performance
Avg Sales per Store	\$2,104	✔ Healthy

Critical Actions Required (Red)

Metric	Current Value	Meaning
Critical Ruptures	3 locations	High-volume stores (> 10 bottles/week) completely out of stock
Stores Affected	3 stores	Need immediate restocking
Products in Crisis	3 SKUs	These products are losing sales RIGHT NOW

Routine Operations (Blue)

Metric	Current Value	Meaning
Routine Stockouts	68 locations	Low-volume stores, normal restocking cycle
Products for Restock	15 items	Standard weekly restocking
Total Stockout Rate	71 of 2,299 (3.1%)	Well within normal operations

Risk Monitoring (Orange)

Metric	Current Value	Meaning
High Risk Locations	241 locations	Less than 2.5 weeks of supply
Medium Risk Locations	38 locations	2.5-4 weeks of supply
Stores with Alerts	297 stores (76%)	Proactive monitoring coverage

4. Detailed Drill-Down Reports (100% Complete)

Alyssa can click any card to see full details:

Critical Ruptures Detail:

- Exact product name, store name, location
- Sales rep responsible
- Weekly sales velocity (shows business impact)
- Recommended order quantity

Routine Stockouts Detail:

- Prioritized by sales velocity
- Low-volume stores identified
- Standard restocking quantities

Risk Monitoring Detail:

- Forecasted stockout dates
- Weeks of supply remaining
- Recommended order quantities

Sales Performance by Product:

- Top-selling products ranked
- Rupture rate per product
- Total inventory value

Top 3 Priority Restocks Right Now

Product	Store	Sales/Week	Impact
Cherry River Tequila Silver	SAQ Montreal Downtown	18 bottles	High - Popular store
Cherry River Petits Fruits Basilic	Store 23102	17 bottles	High
Opémiska Boréal Bleuets	Store 23067	11 bottles	Medium

Products with Highest Rupture Rates

Product	Stores Carrying	Stores in Rupture	Rate
Collection Réconfort	22	4	18.2%
Crème Glacée Coaticook	53	6	11.3%
Opémiska Whisky Érable	56	5	8.9%

Note: These may need attention in upcoming restocking cycles

What's Left to Complete the COO Weekly Ops Pack

Phase 2: SAQ-Odoo Integration (Blocked - Need Your Input)

The Missing Link: We need a mapping between SAQ product codes and your Odoo product IDs.

Why it matters:

- Currently we know: "SAQ stores need 450 bottles of Tequila"
- We can't answer: "Do we have 450 bottles in Cherry River's warehouse?"
- We can't generate: "Produce 330 more bottles" or "Ship from warehouse"

What we need from you:

A simple spreadsheet:

SAQ Code	Cherry River Product Name	Odoo Product ID
14954892	Cherry River Tequila Silver 750ml	?
14758699	Opémiska Boréal Bleuets Sauvages	?
...	...	...

How to get this:

- Option A: Export from Odoo if SAQ codes are stored there
 - Option B: Manual mapping (30 minutes of your time)
 - Option C: We extract from your SAQ invoices if available
-

Phase 3: Complete COO Cockpit (After Mapping)

Once we have the mapping, we will add:

1. Supply Chain View

- SAQ Demand vs. Warehouse Stock (side by side)
- "Can we fulfill this order from warehouse?" - Yes/No
- "Do we need to produce more?" - Automatically calculated

2. PO Recommendations

- Auto-generated purchase orders based on demand
- Alyssa clicks "Approve" → Creates PO in Odoo
- No more manual calculations

3. Production Priority List

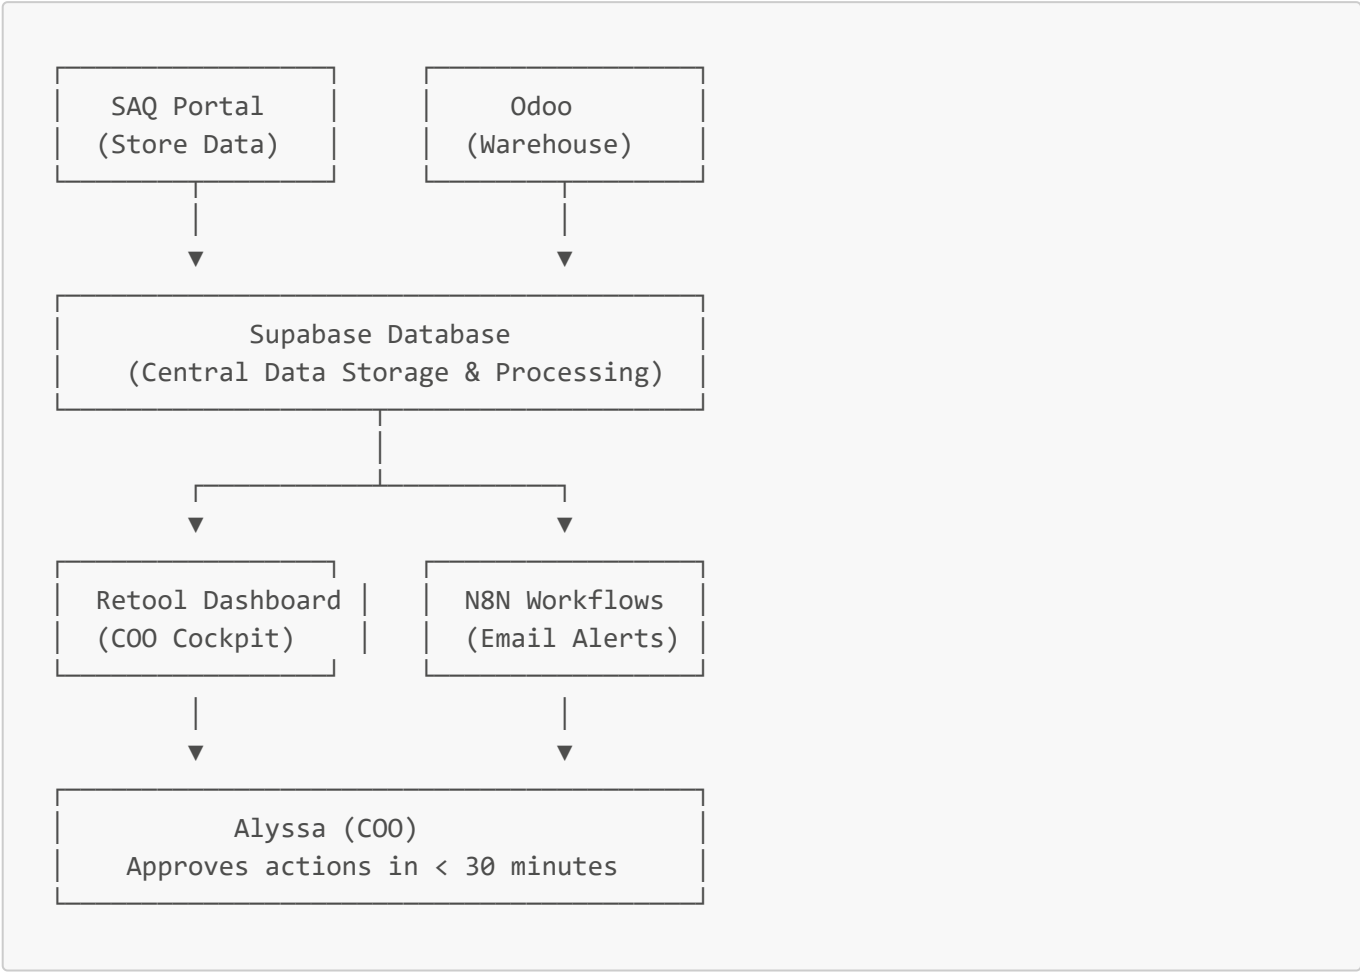

- Which products to produce first (7-14 day horizon)
- Based on SAQ demand + current warehouse stock
- Includes raw material requirements

4. 30-Day Demand Forecast

- Projected stockouts by week

- Production scheduling recommendations
- Early warning for seasonal demand changes

Technical Architecture (Simplified)

Success Criteria Progress

Criteria	Target	Current Status
COO can approve all weekly actions in < 30 minutes	100%	60% (SAQ side ready, need Odoo integration)
No SKU enters stockout without appearing in COO Brief	100%	✓ 100% (All 24 SKUs monitored)
Automated Monday morning reports	Enabled	✓ Ready (just need to schedule)
Email alerts to sales reps	Enabled	✓ Complete
PO generation from dashboard	Enabled	🕒 Pending (needs mapping)
Production scheduling	Enabled	🕒 Pending (needs mapping)

Recommended Next Steps

Immediate (This Week)

1. **Review this dashboard** - Does the information make sense? Any changes needed?
2. **Provide SAQ-Odoo mapping**
3. **Confirm Alyssa's requirements** - Any additional metrics she needs?

Short-Term (Next 2 Weeks)

1. Load mapping into system
2. Build unified SAQ + Odoo view
3. Add PO recommendation engine
4. Test with Alyssa

Medium-Term (Month 2)

1. Automate Monday 6 AM runs
2. Add production scheduling
3. Integrate approval workflow with Odoo
4. Train Alyssa on full system

Questions for Francis

1. **SAQ-Odoo Mapping:** Can you provide this mapping, or should we extract it from invoices?
2. **Approval Workflow:** Should Alyssa be the only approver, or should POs route to multiple people?
3. **Odoo Integration:** Do you want us to create POs directly in Odoo, or generate them for manual entry?
4. **Production Planning:** Who manages production scheduling? Should they have access to the dashboard?
5. **Historical Data:** Do you want us to load historical SAQ data (past weeks/months) for trend analysis?

Summary

What you're getting:

- Complete visibility into SAQ store inventory across Quebec
- Automated alerts before stockouts happen
- One dashboard for all operational decisions
- < 30 minute weekly approval workflow

What's working today:

- 24 products monitored
- 390 stores tracked
- 3.1% rupture rate (excellent)
- \$820K weekly sales visibility
- Automated email alerts

What's next:

- Connect SAQ demand to Cherry River warehouse
 - Auto-generate PO recommendations
 - Production scheduling integration
-
