

Cherry River - COO Dashboard Status Update

Date: January 28, 2026

✓ COMPLETED FEATURES

1. SAQ Sales & Inventory Dashboard (Live)

- Real-time warehouse inventory visibility (Montreal & Quebec City)
- Automatic alerts when products need reordering (COMMANDER / SURVEILLER / OK)
- Year-over-year sales comparison by product and SAQ period
- Open orders tracking with delivery countdown
- Store-level inventory across 381+ SAQ locations
- KPI summary cards (total stock, units on order, bottles in stores)

2. Automated Daily Data Updates

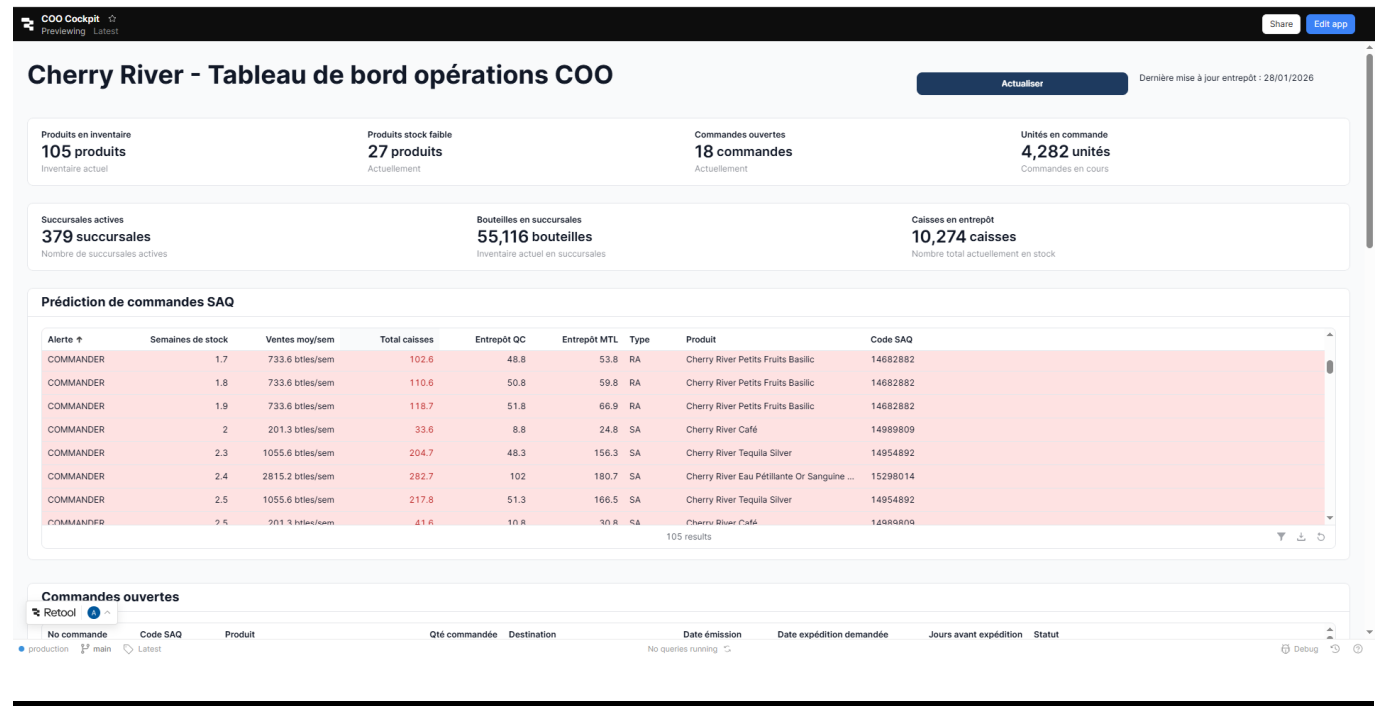

- Daily inventory updates flow automatically from Patrick's automated rapport
- Warehouse, store inventory, and order status refresh daily
- No manual data entry required for SAQ data

3. ID Foods Forecast Management

- System ready for Alyssa to upload ID Foods forecasts (3-4x per year)
- Simple CSV upload form — paste data, click submit
- Monthly forecast view by product

4. Product Lead Times

- All 465 supplier lead times imported and linked to Odoo products
- Foundation ready for production planning calculations

IN PROGRESS / NEXT PHASE

1. ID Foods Tracking

- **Need:** Actual order data from ID Foods to compare forecast vs reality
- **Deliverable:** Dashboard showing forecast accuracy and variance

2. Bars & Restaurants (Private Imports)

- **Need:** Clarify data source (Odoo sales orders?)
- **Deliverable:** Sales tracking by restaurant/bar client

3. Production Planning

- **Need:** Finalize BOM data sync from Odoo
- **Deliverable:** "What to produce" recommendations based on forecasted demand

4. Purchasing Planning

- **Need:** Inventory thresholds for raw materials & packaging
- **Deliverable:** Automated alerts for bottles, cans, ingredients, etc.

FUTURE PHASES

- Production calendar with capacity planning
- Automated PO generation and supplier email drafts
- Logistics module (pickup scheduling, bills of lading)

CURRENT DASHBOARD ACCESS

The dashboard is live and accessible in Retool. Data refreshes automatically.

What Francis can do now:

- See which products SAQ will order soon
- Compare this year's sales vs last year
- Track all open SAQ orders and delivery dates
- View inventory distribution across all SAQ stores

 BLOCKERS - WHAT WE NEED TO PROCEED

1. SAQ to Odoo Product Mapping (From Patrick)

We need a file that links SAQ product codes to Odoo product IDs. This is critical for:

- **Production Planning:** Knowing which Odoo product to produce when SAQ stock is low
- **Inventory Reconciliation:** Matching SAQ sales data with Odoo inventory
- **BOM Explosion:** Calculating raw material needs based on SAQ demand

Required format:

SAQ Code	Odoo Product ID	Product Name
14001338	78	Cherry River Vodka Premium
14064873	???	Cherry River Érable
...	...	...

Patrick mentioned he would provide this mapping. Once received, we can:

- Link SAQ demand forecasts to Odoo production
- Calculate raw material requirements automatically
- Enable the full production planning module

2. ID Foods Actual Orders

To show forecast vs actual comparison, we need:

- Historical order data from ID Foods (what they actually ordered)
- Or: set up a process to log incoming ID Foods POs

3. Bars & Restaurants Data Source

Clarification needed:

- Are bar/restaurant sales tracked in Odoo as sales orders?
- If yes, which customer category identifies them?
- If no, how is this data currently tracked?

 ACTION ITEMS

Item	Owner	Status
Provide SAQ-to-Odoo product mapping	Patrick	Pending
Confirm ID Foods order tracking method	Francis	Pending
Clarify bars/restaurants data source	Francis	Pending
Dashboard refinements based on feedback	Dev Team	Ready when above items received
